WORK EXPERIENCE

Full Stack AI Engineer

Jul 2024 – Present

Collective Global

Contract

- **SourcingGPT:** Lead engineer on a B2B agentic supplier-sourcing platform. Built the supplier-discovery pipeline combining lexical and semantic search (PostgreSQL + pgvector), the n8n-based orchestrator that routes buyer chat into tool calls, and an AWS SES email pipeline handling threaded buyer/supplier conversations end-to-end.
- **VETsage:** Built a clinical-report system that ingests scanned veterinary records via AWS Textract, runs them through a DeepSeek-based RAG layer, and outputs structured visit reports. Deployed in beta to veterinary clinics in Hong Kong and Australia.
- Owned cross-product infrastructure: AWS Cloud backends with S3, Lambda, SES, and Textract, paired with React, TypeScript, and Tailwind frontends. Set up deployment, CI, and prod/staging split.

Coding Instructor

May 2025 – Present

BSD Education

Part-time

- Taught HTML, CSS, JavaScript, and Python to 100+ K–12 students (ages 7–14) across online curriculum, after-school classes, and holiday coding camps.

IBM Z Student Ambassador

Sep 2025 – May 2026

IBM

Ambassadorship

- Gave keynote talks at IBM Z & LinuxONE Community Day 2025 (Hong Kong) and IBM Z Day 2025, with 1,000+ total attendees across both events.
- Founded an IBM Z student community at the University of Hong Kong, growing it to 20+ members through outreach and enterprise-mainframe sessions.

Software Engineering Intern

Sep 2023 – Mar 2024

BSD Education

Internship

- Deployed a localised LLaMA-2 chatbot on AWS EC2 with llama.cpp quantisation for CPU-only inference, then built the prompt and conversational-memory layer for 500+ educators.
- Built the Python REST API behind it (rate limiting, request queuing, custom admin interface), wired into a platform reaching 150,000+ students.

SKILLS

Languages & Frameworks: Python, C++, TypeScript, Java, SQL, React, Tailwind, Vite

Cloud & Tools: AWS (Lambda, S3, SES, Textract), Firebase, PostgreSQL, Docker, Git, Linux/Unix, n8n

AI: RAG Pipelines, Vector Embeddings, LLMs, Model Context Protocol (MCP), Prompt Engineering

EDUCATION

The University of Hong Kong, BEng in Computer Science

Sep 2024 – Jun 2028

Relevant Coursework: Data Structures & Algorithms, Linear Algebra, Probability & Statistics, Discrete Mathematics, Programming & Technologies (C++), Object Oriented Programming (Java), Calculus & ODEs

HONOURS & AWARDS

Founding Team Member, SourcingGPT, Antler Inception SG20

Feb 2026

Finalist, GenAI Hackathon for SDGs, The University of Hong Kong

Oct 2024

Student of the Year, DSC International School

Jun 2024

Governor General's Academic Medal, DSC International School

Jun 2024
